Thank you for your interest in our software products: Expert AutoStats®, Expert Qwic Calcs®, Expert VIN DeCoder®, and 4N6XPRT Ped & Bike Calcs®.

The following calculations/menu selections are available for the demonstration version of **Expert Qwic Calcs®**:

I.D. Vehicle
Vehicle Specifications (**Expert AutoStats®**)
Braking Calcs - 1st and 4th options
Acceleration Calcs - 1st option on screens 1 and 2
Curve Calcs - 3rd option
Conversion Calcs - 1st option
Combined speed on menu 2

Information on the following vehicles is available in the demonstration version of **Expert AutoStats®**:

75 AMC Pacer	85 Cheverolet C-20
88 Acura Legend	70 Jaguar XJ12
85 Mercury Cougar	79 Dodge B100

To get to the Expert AutoStats® program from Expert Qwic Calcs®, you must be on the first menu screen.

A demo for our **Expert VIN DeCoder®** program, which allows you to rapidly "DeCode" the information contained within the 17 character VIN numbers of cars, vans, utility vehicles, and light trucks, is also included. The demo program will allow you to decode a 17 character VIN for a Checker, Avanti, or Hummer vehicle between model years 1981-1993. Several sample VINS are:

1CMTS412XBK005261	1CMME4324CK001355
12AAV1238G1003417	137XE8431PE133756

Finally, we have included the demonstration version of our **4N6XPRT Ped & Bike Calcs®** program which is useful in quickly evaluating vehicle speeds in Pedestrian and Bicycle accidents. The demo will only accept defaults for several of the inputs, but will also allow you to get a good "feel" for how the program works, and put in real data for most of the inputs.

If you have any questions please do not hesitate to call us at (800) 266-9778 or send an E-mail to: 4n6@4n6xpert.com.

Sincerely,

Daniel W. Vomhof III
